

## MESSAGE FROM GAIA

Message from Gaïa to us :

Gaia loves us all individually and together like her children, unfortunately, our disrespectful, insane, unthinking behaviors make her suffer. It takes on it to absorb and attempt to clean our actions and our thoughts, which have consequences on all levels, geological, physical, energy, cosmic, telluric. However, She must sometimes just like us, evacuate the overflow because she can not "clean" everything she absorbs. Hence climatic and geological triggers, such as tsunamis, earthquakes, volcanic eruptions, tornadoes, storms. She doesn't want to make us suffer, and she is sorry to have to "empty" and "clean" the overflow by triggering what we experience as disasters. Through our actions, thoughts, we destroy the balance of the planet, the natural ecosystem that allows us to maintain the necessary balance for all and for all species, including Humans.

By destroying the forests, we destroy our Brothers who have a role of balance of the sub soil, energetic filtration of the earth and the subsoils, we destroy our lung which allows us to breathe. By polluting the seas and oceans in chemical and energetic ways, we destroy our Brothers who maintain their balance.

As a living being that we are, Gaia, to heal herself, and to free herself, coughing by spitting volcanoes, to expel the overflow, who can no longer absorb the negative energy to "burn", transmute and purify. Her body can not absorb more, separates like our skin that dries out, and causes earthquakes, tornadoes, are our sneezing to evacuate and clean the infection that affects her. She tries with all her love to protect us and to protect all her visible and non-visible children but she can not absorb more. For our survival and protection, she must continue to be who she is, to allow us to keep within her and on her surface. She loves us and hopes as the Mother that she is, that her children will wake up and return to the path of consciousness, the wisdom that sleeps in us, and the Harmony between all her children, our Brothers and Sisters, Beings Humans, Plants, Animals, Minerals.

Gaia loves us with all her love, she does not judge us. We are her children and as any child we must experience and learn from our mistakes.

Like the benevolent Mother she is, she wishes us to become aware of our actions and to evolve for our good, for her good, for the good of our Brothers and Sisters under all forms.

With all her love, she is sincerely sorry to have to hurt and destroy some of her children in this process of cleaning but it is the only option that is available to protect us all and protect this temporary house that is our so that this one lasts for us and the generations to come. Just like us, she continues her evolution to find her initial "place".

She "smiles" with tenderness, surrounds us with her benevolence even if we are not aware of it, and radiates her love so that we can find our individual paths, and our path together towards Evolution and the return to our Essence, the path to the connection to the Source, the path to our Beings.
